

# Chad Bustard

University of Wisconsin - Madison  
Advisor: Ellen G. Zweibel

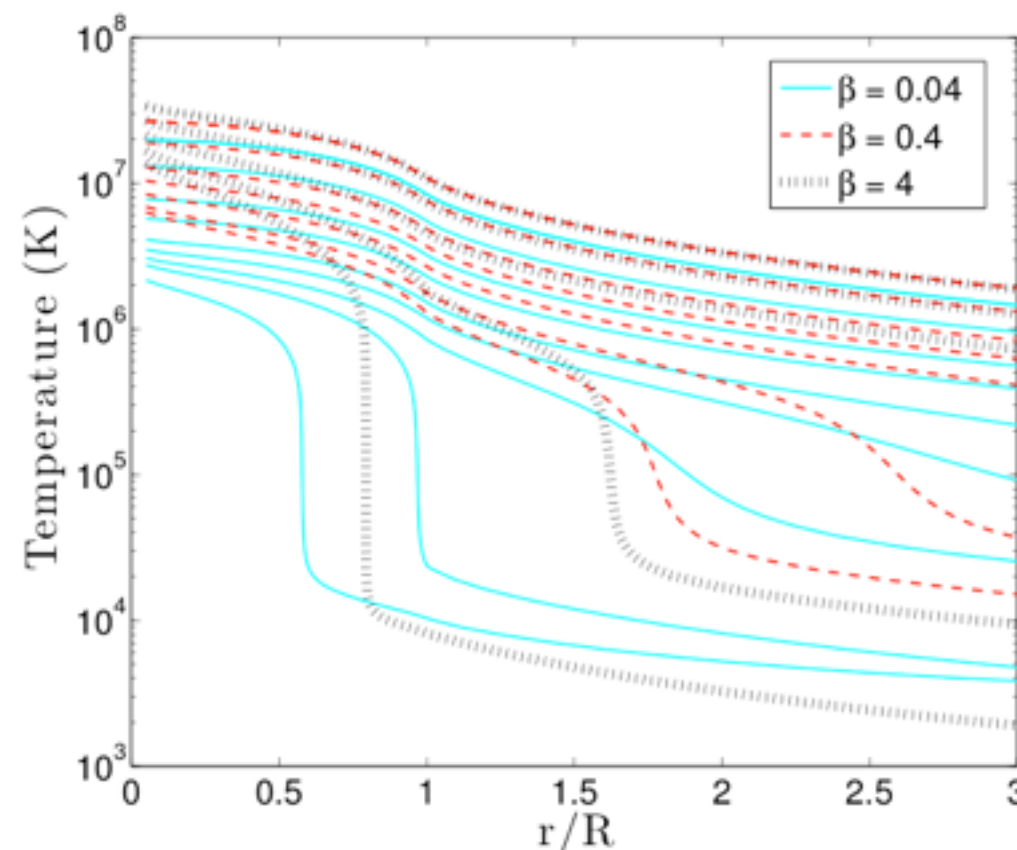

## Primary Research Interest: Galactic Winds

Versatile toy model described in Bustard, Zweibel, & D'Onghia (2016), ApJ

What can we say about mass outflow rate?  
Importance of radiative cooling?

How do various cosmic ray treatments affect the outflow?

Galactic wind termination shocks - implications for CGM and observations? Cosmic ray accelerators?
